

13 May 1986

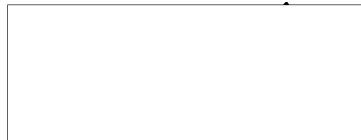

MEMORANDUM FOR THE RECORD

SUBJECT: Inquiry from Mike Carlin - 12 May 1986

1. On 12 May 1986, I took a phone call on behalf of C/NBPO from Mr. Michael Carlin (phone 225-5136), a staffer in Congressman Wolf's office. Mr. Carlin stated that he has been in contact over the past few weeks with Mr. Kent Maxfield of the Ad Hoc Committee. Mr. Maxfield's inquiry (and Mr. Carlin's) was whether or not we were working on options to the Rt. 123 Roadway Improvement plan. I stated that Dewberry and Davis was working on a number of alternatives which centered around various berm treatments. These options include the highest berm possible, a berm with landscaping, a berm with a standard VDH&T sound barrier, and a cost option for a brick wall to match the existing brick wall.

2. Mr. Carlin stated that he would like copies of these option prior to the formal 60 percent design review (I did not volunteer that the review has been scheduled for 5 June). He made a commitment to Mr. Maxfield to present this information to Mr. Maxfield and some 2 to 5 residents of Evermay whose property directly borders the area in question. Mr. Carlin stated that he would be willing to present the material to this group alone or would welcome participation by the C/NBPO. I stated that C/NBPO is on TDY until 15 May but that C/NBPO would contact him on his return to discuss the options in detail and to decide on the presentation format.
